ANIMAL INSIDE OUT

TOURING

IN EUROPE AND NORTH AMERICA

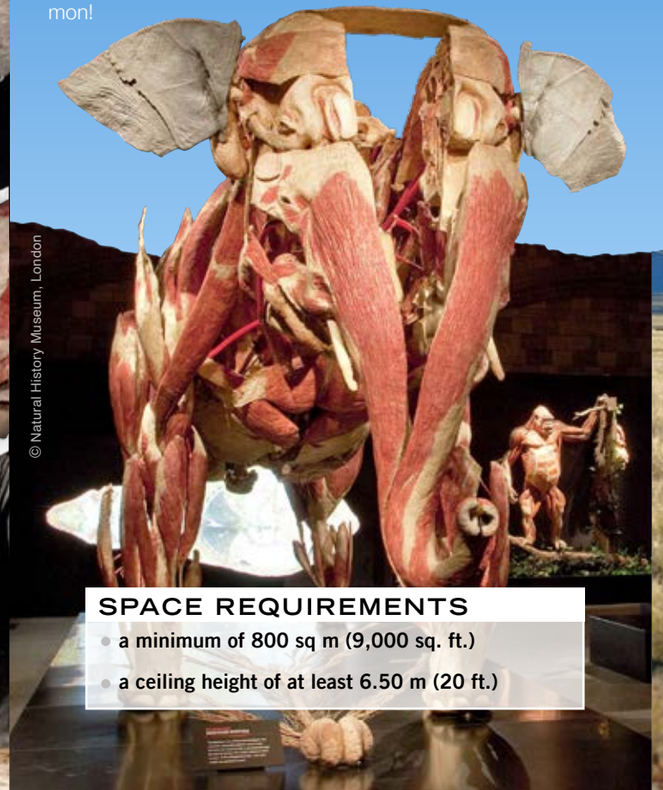
AN EYE-OPENING SAFARI

through the Animal Kingdom

get under NATURE'S SKIN

ANIMAL INSIDE OUT is an unforgettable trip under nature's skin, fur and feathers. The collection of spectacular specimens—from a tiny mouse to a 5-meter-tall giraffe—explores the most amazing aspects of animal physiology, and explains how animals move, breathe, connect, eat and reproduce.

Suitable for the whole family, ANIMAL INSIDE OUT invites visitors to develop a deeper sense of appreciation for our planet while understanding the differences between humans and animals while learning just how much both have in common!



© Natural History Museum, London

SPACE REQUIREMENTS

- a minimum of 800 sq m (9,000 sq. ft.)
- a ceiling height of at least 6.50 m (20 ft.)

Humans can only cherish and protect what we know. The more we know about our co-habitants on planet Earth, the more we will treat nature with the utmost care and respect.

The exhibition has been on display at prime locations throughout Europe and North America. Two versions of the exhibition are available.

ANIMAL INSIDE OUT features specimens that have been donated by zoo's, veterinary programs and farms—all died of natural causes. No animals were killed for the exhibition. All animals have been preserved through plastination for future generations to admire their beautiful and majestic anatomy.

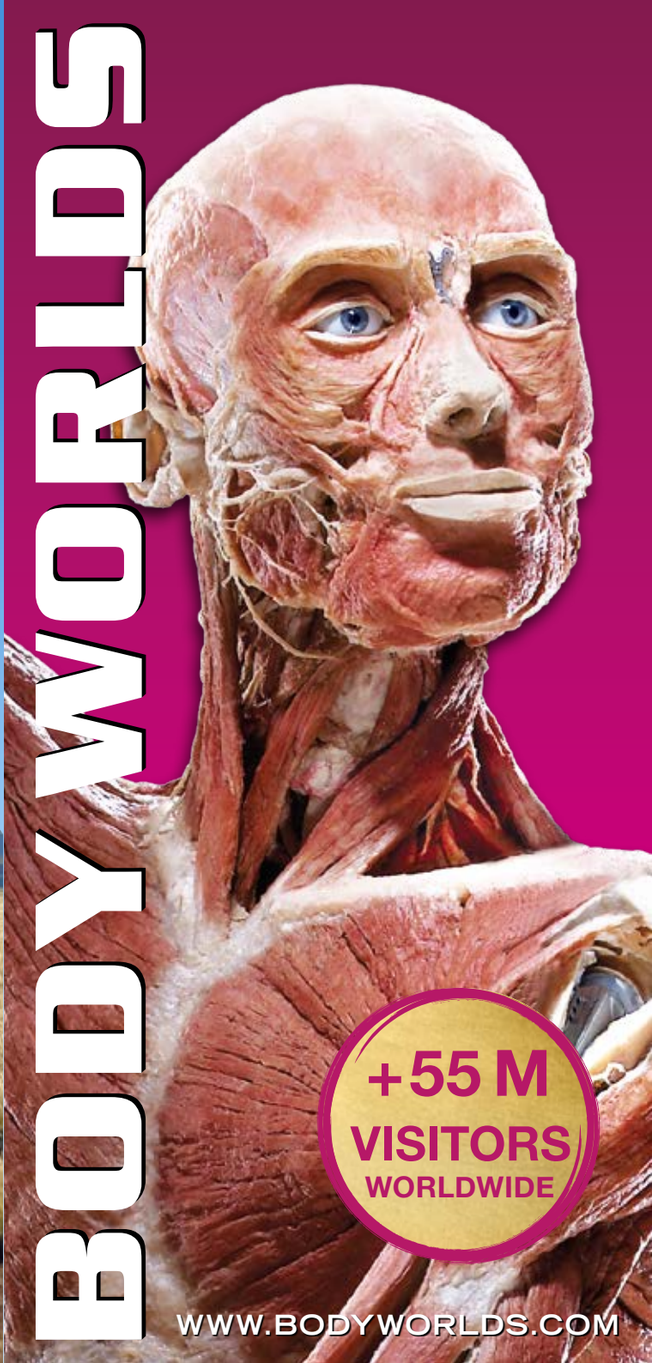
BODYWORLDS



+55 M VISITORS WORLDWIDE

WWW.BODYWORLDS.COM

Exhibitions, that change the way we view ourselves!

The Cycle of Life

shows the body living through time from conception to old age, refracted through the latest findings in longevity and aging science.

The Story of the Heart

features a special presentation on the heart and reveals through the lens of anatomy, cardiology, psychology, and culture how this four-chambered muscle nourishes, regulates and sustains life.

Happiness

teaches amazing facts about which parts of our anatomy are involved in feeling happiness and how positive and negative emotions can affect the entire body.

Vital

celebrates the potential of the human body and the body in motion. Designed for smaller spaces, VITAL tells the fascinating story of how to best fight, manage and prevent life-threatening diseases through healthy choices and lifestyle changes.

Pulse

presents the body in health and distress, its vulnerabilities and potential, and many of the challenges the human body faces as it navigates the 21st Century.

Prescriptions for Healthy Living

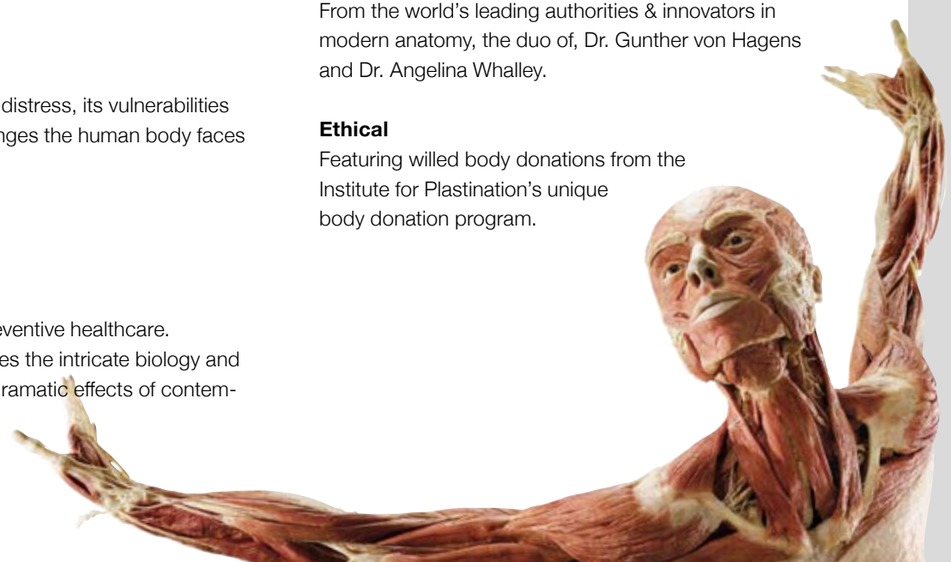
invites the visitor to embrace preventive healthcare. Designed for flexible spaces, it explores the intricate biology and physiology of human health and the dramatic effects of contemporary diseases.

Mesmerizing
Real human specimens of artistic quality, dissected according to the highest scientific standards.

Profound & Life Changing
New and classic themes on life, health and wellness that turn the anatomical exhibition into a profound reflection about one's own life.

Original
From the world's leading authorities & innovators in modern anatomy, the duo of, Dr. Gunther von Hagens and Dr. Angelina Whalley.

Ethical
Featuring willed body donations from the Institute for Plastination's unique body donation program.



SPACE REQUIREMENTS

- Between 450 to 1000 sq m (4,000 to 10,000 sq. ft.)
- Storage for crating and space for foyer and box office
- Ceiling height of min. 4 m (13 ft.)
